## At a glance

Thruway service augments and extends the Amtrak network. It is comparable to regional service offered by airlines that contract with independent carriers to connect smaller cities with mainline service at their hubs.

### Functions:

- Connect offline cities to the network
- Bridge two or more Amtrak stations where train service does not connect easily

### Modes of service:

- Intercity bus - Greyhound or similar
- Shuttle van
- Passenger ferry

### Notes:

1. Amtrak sells Thruway service only as part of an itinerary that includes connecting Amtrak train service.
2. Thruway service does not include connections between Amtrak and other regional or commuter services, such as SEPTA or Metrolink.
